

# Super Repair CoQ10 Moist

Age-Defying Moisturizer with Peptides / Grape Stem Cells

Grape Stem Cells | Palmitoyl Pentapeptide-3 | CoQ10

**DESCRIPTION:** A concentrated blend of active botanicals, enzymes, antioxidants and nutrients to prevent and reverse the signs of aging. Active ingredients, including Peptides, Enzymes, Grape Stem Cells, CoQ<sub>10</sub>, Cranberry and Bilberry Seed Oil, help to reduce the appearance of wrinkles and improve skin tone, texture and firmness, while providing the right balance of moisture to the skin.

## FEATURES AND BENEFITS:

**Fight Aging with Palmitoyl Pentapeptide-3** | An advanced peptide made in-house. Supports cell metabolism and stimulates cell proliferation and

tissue regeneration for bright, healthy looking skin. In vitro clinical studies showed it stimulated wrinkle fighting collagen by 117% and firming collagen by 357%, increased moisture holding capacity by 267%, reduced the surface area of wrinkles by 68% and reduced skin roughness by 16%.

**Protect Against and Reverse Aging with Grape Stem Cells** | *Vitis Vinifera* (Grape) Fruit Cell Extract protects skin against the harmful effects of skin stress caused by UV radiation, responsible for 80% of skin aging, with epigenetic factors and metabolites. It delays the senescence, or the biological aging of essential cells, as well as fights photo aging. The cell extract has an extremely high anthocyanin content which is high in powerful antioxidants and has free radical scavenging capabilities.

**Reduce Wrinkles and Repair Skin** | Advanced peptides including Palmitoyl Pentapeptide-3, Palmitoyl Oligopeptide and Perflurodecalin reduce the appearance of wrinkles, visibly refine and tone skin firmness, and increase oxygen to the skin to support skin renewal.

**Skin Renewal** | *Sigesbeckia (Orientalis)* Extract, CoQ<sub>10</sub>, Tetrahexylidexyl Ascorbate, and Tocotrienols help to re-establish the process of cell energy, transfer and communication in the skin to encourage healthier, younger looking skin. Stabilized Vitamin C is a powerful anti-oxidant which helps repair skin. Heptapeptide-1, Tetrapeptide-1, Palmitoyl Pentapeptide-3, Phospholipids, Niacin and Alphasomes C-8™ help to link the skin's amino acid with Liposomes, nourishing and renewing the skin, helping it to look healthy. Cranberry Seed Oil and Bilberry Seed Oil support skin's phyto-nutrients, helping to repair the epidermal lipid barrier.

**Regenerate & Repair with Enzymeceuticals®** | Doctor D. Schwab's Enzymeceutical® is a specially formulated organic molecule featuring enzymes paired with active ingredients to boost the enzyme's effectiveness. It helps restore skin immunity and significantly improve the chronic fatigue of skin tissue, therefore increasing skin's strength and flexibility while plumping to add necessary moisture.

**Tighten and Brighten** | *Plyllantus Emblica* Fruit Extract, Wasabi Extract, Rosemary Leaf Oil, Peppermint Oil and Sodium Hyaluronate help to lighten age spots, as well as moisturize and tighten skin.

**Advanced Delivery System** | Alphasomal® Complex is an advanced Phospholipid based delivery system that encapsulates active ingredients and enables them to reach the targeted area for superior product performance.
